

Combustible waste

- Write your name on the bag
- Take the trash bag out to the station by 8:00 in the morning.

(By 7:30 in the morning in Yuhara, Himekawa Onsen, and Oami areas)

Every Monday and Friday.

Please drain any kind of excess water from food waste.

Put the waste in designated **combustible trash bags** (bag size: large, medium, small).

- **Miscellaneous papers**  **plastic containers and packaging**  **plastic bottles** → **should be sorted as recyclable resources.**
- **Drain any kind of excess water from food waste.**
- **Edible oils that cannot be recycled should be hardened or absorbed with paper or rags.**
- ★ **Illegal dumping and incineration of waste are prohibited by law!**

<Food waste and paper waste>

Food waste should be treated in house as much as possible with composting or processing equipment.

※ Paper waste means the ones that cannot be recycled, such as miscellaneous papers.

<Plastic products>

Toys, CDs, video tapes, non-recyclable plastics, etc.

Completely remove gas and oil from disposable lighters.
In case of large quantities, contact the staff in charge of resident at the local government office.

<Leather and rubber products>

Bags, leather shoes, rubber shoes, etc.

<Wood waste>

Branches, disposable chopsticks, etc.

Cut it into a size that fits in a garbage bag and put it in the designated bag.

<Dirty cloth/clothing>

Cut them into pieces less than 50cm square. Clean clothing (excluding underwear and socks) should be sorted as recyclable resources.

<Diapers>

Dirty diapers should be discarded in the toilet.

Metals

Including steel cans

Write your name on the bag
 Take the trash bag out to the station by 8:00 in the morning.
 (By 7:30 in the morning in Yuhara, Himekawa Onsen, and Oami areas)

Unsorted items will not be collected from the station.

Dry battery cells

First Tuesday, once a month.

Designated **metal-only** bags, Put them in bags (bag size: large, medium, small)
 Small home appliances that fit in the designated bag can be put out as metals, but please use the Hakuba Recycling Center / village Oversized waste as much as possible.

- Take the steel cans out as “Metals.” (Do not mix aluminum cans.)
- Make sure to open a hole in the spray can and remove the gas completely.
- An empty can is up to the size of an 18-liter square can.
- Small dangerous items such as sewing needles, razors, and nails should be placed in a can, and the word “Kiken (Dangerous)” should be written on it.

<Empty cans>	<Metals>	<Aluminum products>	<Small home appliances>
 <p>Spray cans and cans for sweets with the mark.</p>	 <p>Pots, kettles, frying pans, etc.</p>	 <p>※  Excluding aluminum cans. (See P17)</p> <p>Kettles, aluminum pots</p>	 <p>Remove the built-in battery</p>

※The above <Empty cans> , <Metals> , <Aluminum products> , and <Small home appliances> can be mixed in the same bag.

First Tuesday, once a month.

Put them in a trash bag where we can see the contents.

- Small dry battery cells, button batteries, and small rechargeable batteries for mobile phones, etc.
- **Do not mix them with “Metals.”**

We would like to ask for your cooperation for separation and volume reduction.

China/ glasses

Check the calendar for the collection date.

Put them in a clear plastic bag.

If you can see the contents, you can use a translucent bag.

Rinse bottles for food and drinks, cosmetics, and medicines, and separate them into "Glass bottles" for recycling.

Recycle beverage bottles!

- Do not put fluorescent lamps (straight tube type) or fluorescent lamps (round/circle type) out. They are collected at Hakuba Sanroku Clean Center and Chikunizaki Warehouse.
- Construction waste (window glass, etc.) should be disposed of on an oversized waste collection day or for industrial waste treatment.

※For bottles made of milk-white ceramics for alcoholic beverages and glass containers for ointment, please sort them as "China/glasses."

Items that cannot be put out.

Fluorescent lights, window glasses, etc.

Fourth Wednesday, once a month.

Put them in a clear plastic bag.

If you can see the contents, you can use a translucent bag.

Look for this mark!

Items without the mark are not eligible.

- Rinse with water and gently crush.
- Bottle-type lids and cans' lids (made of aluminum) should also be sorted as "Aluminum cans."
- Aluminum pots and aluminum foil other than empty cans should be sorted as "Metals."

Do not mix steel cans. They should be sorted as "Metals."

Take the trash bag out to the station by 8:00 in the morning.
(By 7:30 in the morning in Yuhara, Himekawa Onsen, and Oami areas)
※Unsorted items will not be collected from the station.

They can be sold as resources.

Aluminum cans

News papers

Second Tuesday, once a month.

They can be sold as resources.

May August November February Not collected
Bind them with a string in crisscross fashion.

- You may mix flyers in newspapers.
- Brochures can be sorted as magazines and miscellaneous papers.
- The string does not have to be a paper string.

• Take them out to the station by 8:00 in the morning.
(By 7:30 in the morning in Yuhara, Himekawa Onsen, and Oami areas)
※ Unsorted items will not be collected from the station.

They can be sold as resources.

Fourth Tuesday, once a month.

Look for this mark!

July February Not collected

Bind them with a string in crisscross fashion.

- With a corrugated shape in cross section.
- Make the cardboard flat and uniform in size.
- Do not mix anything other than cardboard, such as thick papers or paper containers and wrapping papers.
- The string does not have to be a paper string.

Remove clasps as much as possible.

Cardboard

We would like to ask for your cooperation for separation and volume reduction.

Magazines, miscellaneous papers, flyers

They can
be sold as
resources.

Put the waste out to the station
by 8:00 in the morning.
(By 7:30 in the morning in Yuhara,
Himekawa Onsen, and Oami areas)
※Unsorted items will not be collected
from the station.

Third Tuesday, once a month.

Bind them with a string in a crisscross fashion.

Miscellaneous
papers are
great
resources!

- Sort them by size.
- Never mix plastic bags, etc.
- The string does not have to be a paper string.

How to
take the
waste out.

Remove the vinyl window
and cellophane tape
from the envelope.

Put small papers
in an envelope
or a paper bag.

Keep the big ones as they are and
bundle them together with magazines.

※You can bundle
magazines and
miscellaneous
papers together!

What are "Magazines"? ● Books, notebooks, magazines, manga books, catalogs, picture books, etc.

What are "Miscellaneous papers"?... ● You cannot put them out as paper container packaging, but they can be recycled as miscellaneous papers.

 **Paper waste without the mark** Notifications from government offices and schools, drawing paper, brochures, posters, copy papers, toilet papers and paper tubes, envelopes (cut out the window), calendars, heavy stock papers inserted in a shirt, post-it notes, New Year's cards (not photographs), size tags and price tags of clothing, etc.

Items that cannot be put out The following items cannot be sorted as "Magazines/Miscellaneous papers."

- Hair dryers, electric razors, electric toothbrushes
- Hard disks, CD drives
- Printers
- E-book devices
- Flashlights, lighting equipment
- Sawing machines
- Electronic clocks, electric clocks
- Electric grinders, electric drills
- Electronic keyboards, electronic guitars, electric guitars
- Word processors, calculators, electronic dictionaries
- Electronic and electric toys such as game console
- Their accessories (AC adapters, cables, plugs, connectors, chargers, remote controls, etc.) are also eligible.

We would like to ask for your cooperation for separation and volume reduction.

Watery garbage can account for 60% of the weight of burnable garbage.

Reduce combustible waste more!!

The amount of “Food waste” can be reduced with simple efforts!

1. Drain food waste well.

If you want to put “Food waste” out as burnable garbage, drain it thoroughly before placing it at the garbage station. The weight is reduced and the garbage station remains clean without dripping water.

2. Finish all dishes served for you.

The leftovers rot and become a source of smell. Let's try to reduce leftovers also from the hygiene point of view.

3. Do not cook too much.

Cooking too much meals can increase the amount of garbage. Adjusting the amount meal to cook can also save on energy bills.

Concerning processing of food waste at home.

Food waste can be processed at home by using compost, etc., without disposing of it as garbage.

- Process in your own field: Use compost etc. to process food waste in the field.
- Garbage composting base material: Use cardboard or crates to make compost using the base material.
- Electric garbage disposal unit: Let's treat food waste using an electric garbage disposal unit.
- Efforts for composting in villages: Let's compost food waste and use it as compost for rice and vegetable fields.

Subsidies System for Garbage Composting. (Try to compost and reduce food waste.)

● Subsidy for purchasing a household garbage disposal unit.

Subsidy 2/3 of the purchase price (up to 40,000 yen).

(If you are planning to purchase one, please consult the staff in charge of resident at the local government office in advance.)

● Subsidy for purchasing garbage disposal equipment for businesses

Subsidy within 1/2 of the purchase price (up to 1,000,000 yen).

(If you are planning to purchase, please consult the staff in charge of resident at the local government office in advance.)

● Subsidy for purchasing garbage composting base materials “Waku Waku Packun”

Subsidy of 300 yen per item for a fixed price of 605 yen.

(Available at JA Okita Otari Branch for 305 yen each.)

● Subsidy for setting up a composting facility in village, etc.

Subsidy within 1/2 of the cost of equipment required for setting up the facility (up to 500,000 yen).

(If you plan to install one, please consult the staff in charge of resident at the local government office in advance.)

Subsidies concerning garbage stations

● Subsidy for Waste Station Installation and Renovation Projects

If you plan to renovate or set up a waste station in each area to make it easier to take out recyclable waste (e.g. making a recycle station, installing shelves inside the station, etc.), please consult the staff in charge of resident at the local government office.

【Items that cannot be processed even by Otari Village/North Alps Wide Area Union】

The following items cannot be accepted even by Otari Village/North Alps Wide Area Union. Please dispose of them at the responsibility of waste disposers.

Dangerous and harmful items

Materials with inflammability, irritating odor or toxicity such as pesticides (including containers), lacquer, paints, fuel oil, thinner, engine oil, machine oil, propane containers, fire extinguishers, etc.

- Ask a store, fuel store, or industrial waste disposal company to take them over.
- For pesticides (containers), please consult with JA Daihoku Otari Farming Center (0261-82-2042).

Industrial waste

- Industrial waste: Items that are discharged from companies, shops, and offices and are specified by law.
- Building waste materials: Pillars, wall materials, window frames, floor paints, curing sheets, packing materials, etc.
- Agricultural waste such as agricultural mulch, greenhouse, ridge sheets, nursery boxes, fertilizer bags and agricultural equipment

- Ask an industrial waste disposal contractor and distributor to collect them.
- Please process appropriately according to the Waste Management Law.
- Concerning agricultural vinyl, please consult with JA Daihoku Otari Farming Center (0261-82-2042).

Medical waste

- Injection needles, their containers, pharmaceuticals, etc.

- Please consult medical institutions, distributors, or stores where you purchased the products.

Illegal dumping and incineration of garbage are prohibited by law!
